Compatible flooring and wall cladding system

Made for each other

Anthony and Cleopatra. Ant and Dec. Fish and chips. Some things are meant to be together – like Altro flooring and Altro wall cladding. They've been designed to fit together perfectly, forming a sealed, watertight system for enhanced safety and hygiene. And because our flooring and wall cladding are designed to be compatible, when they're installed correctly, you won't need to worry about joined surfaces 'parting company'. This makes them great for areas like kitchens and bathrooms where you can't compromise on safety and hygiene.

Coordinating designs

Our flooring, wall cladding and doorsets aren't just designed to work well together – they're designed to look good together, too. We develop our colour palettes to match or complement each other, so you can create harmonious interiors.

Of course, there are times when you want colours to contrast – for example, to aid way finding for those with dementia or impaired vision. We have lots of expertise in this area and can give you information on appropriate colour combinations.

Matching accessories

We also have a range of accessories to enable you to create watertight, fully sealed junctions between our flooring and wall cladding – including colour-matched joints and welds for discreet transitions and a great-looking installation. Job done.

Saving you time, hassle and money

When you buy flooring and wall cladding from us, life becomes easier. You'll just need to deal with one person, saving you time and hassle. We also offer the convenience of:

- full project management, including specification writing, cleaning information and on-site demonstrations
- dedicated technical hotline, customer care centre and local sales consultants covering all projects
- site visits when required – pre, during and post installation
- readily-available stock and delivery, with a nationwide distribution network
- a full range of CPD presentations to help you understand the key factors in product choice
- package pricing

Peace of mind

Altro were established over 95 years ago and we're now a leading global manufacturer. This means you can rely on us to deliver what you need, when you need it. The Altro promise is our commitment to putting you first in everything that we do.

Guarantees for products

We have full confidence in the long-term performance of our products, and we back this up with generous, industry leading guarantees.

Tested and proven products

With over 60 years' experience in safety flooring and 30 years' experience in hygienic wall cladding, we have an in-depth understanding of the market and know our products stand the test of time.

- All Altro products are rigorously tested to UK and European standards
- We have lots of case studies and testimonials for your references
- Trial areas and local references sites are available – just ask

Sustainability

We can help you reduce your carbon footprint with our sustainable products. Our safety flooring contains recycled parts, and some of our flooring can be re-used and recycled post-consumer. To maximise recycling of our products, we co-founded the Recofloor recycling scheme in 2009 and founded Recowall in 2010.

Don't forget, if you want help writing NBS specs just ask!
